

The mobile erasure & diagnostic solution for your devices at scale to ensure compliance and maximum value.

Securaze Mobile Operations software bundle provides complete support for smartphones and tablets.

Designed and built for speed, scale, security and convenience.

Built for Telco, Mobile Processors, mobile traders, OEM and mobile repairer, Securaze Mobile was designed to optimize the value of smartphones and tablets in the market by providing industry standard erasure and diagnostic.

Almost 1.4 billion new smartphone has been sold in 2020 and this is increasing by the year. Securaze Mobile Operation allows erasure and diagnostic to be executed prior to re-purpose, re-sold, and re-use to save the environment.

Audit and compliance

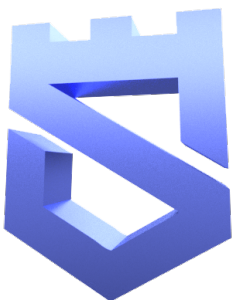

- > Meeting industry standard and R2 compliance
- > Certified by Common Criteria, TUV, ADISA and Independent 3rd Party Forensics
- > Compliance with EU GDPR and Regional Data Privacy Act
- > Compliant with ISO 27001
- > Detail erasure & diagnostic report as audit proof
- > Verified erasure process
- > 3rd Party Auditor permissions

Flexible deployment

- > Easy setup on Windows or Mac machine
- > Concurrent 60+ device erasure
- > Support mix of iOS and Android processing
- > Easy configuration via primary systems setup with duplication to scale
- > Flexible license management

Convenience & Cost Reduction

- > Available in multiple languages
- > Low hardware spec for setup
- > Integrated remote live support with secure access control
- > Smart licensing – only based on successful erasure
- > Multiple user access management
- > Rapid iOS data clear verification
- > Native FMiP identification
- > Extensive iOS OEM parts validation

Your Success is Our Success.

Unlike other data erasure providers,
Securaze only charges for successful erasures.

Reducing cost and wastage of license usage for customers.

Powerful technology customized for your organization.

Mobile Operations by Securaze® is built to give your organization access the leading auditing and erasure technology on your terms.

CONVENIENT

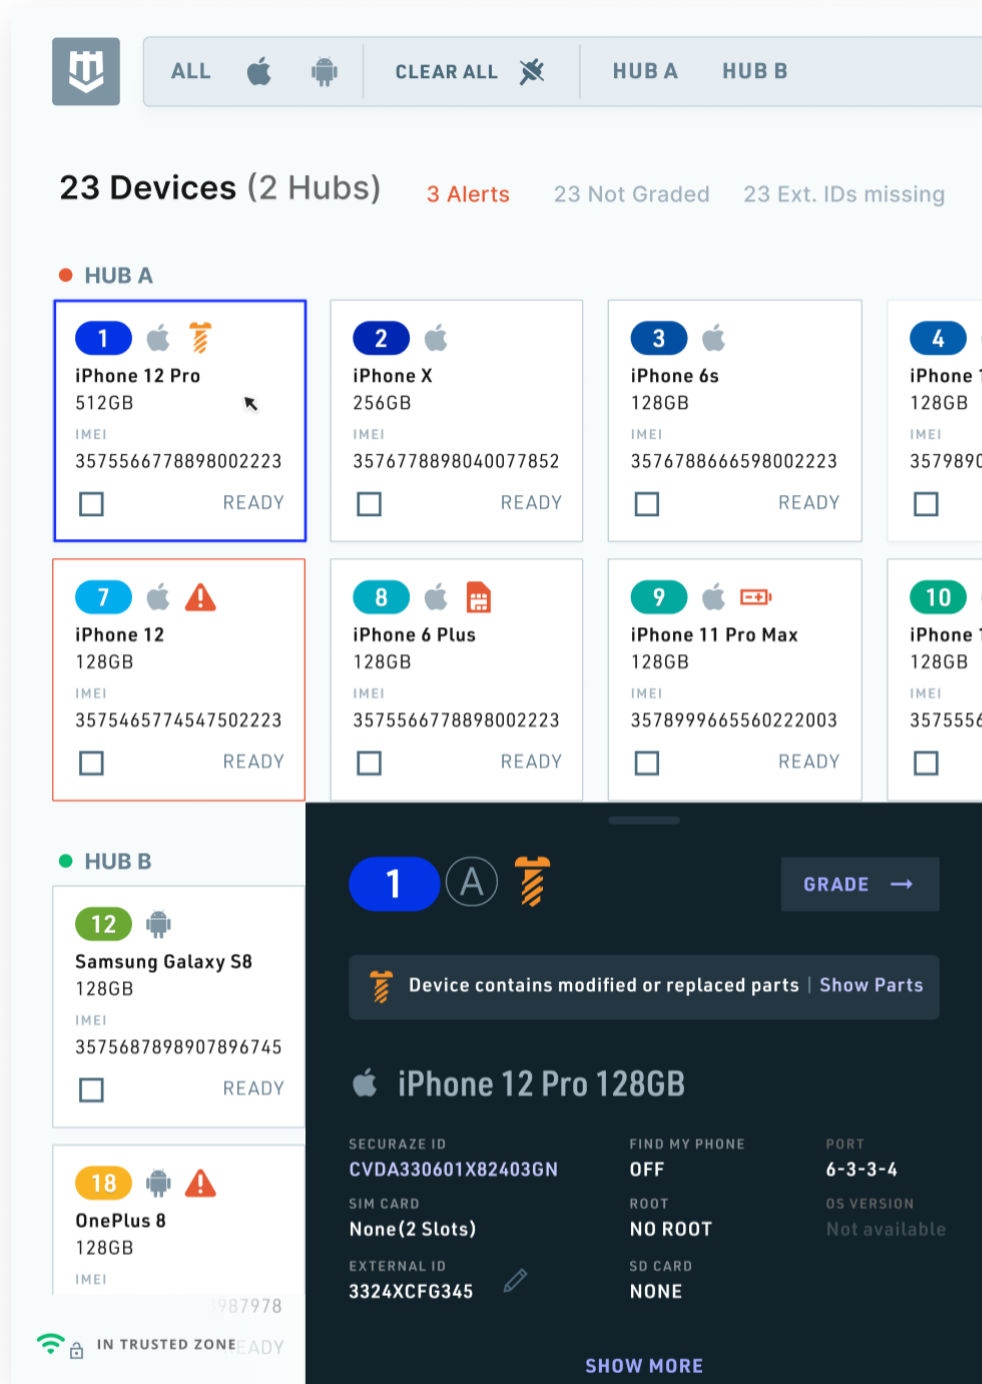

- Installation on Windows or Mac systems
