**SECURAZE**

Remote
operations by securaze

Erase your data — anytime, anywhere

Securaze Remote Operations is the intuitive solution that allows end users and the IT team to easily erase desktops and notebooks anytime, any location - with or without an internet connection.

Remote work has become the norm rather than the exception, and instituting data and device end-of-life policies and practices that aggressively protect sensitive or private information across this distributed environment must be developed, executed, and updated accordingly.
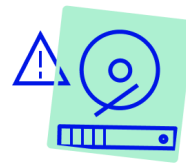

With Securaze Remote Operations, IT teams can enlist a certified data erasure service, complete with a tamper-proof audit trail for devices outside the office that need to be properly sanitized prior to return, resell, repurpose, or disposal.

≡✓ Hello Joe, before you start

Backup important files
After erasure your files will be lost forever.

Verify disk space
The Securaze app needs at least 1GB of free space.

Repurpose device
Reduce e-waste and contribute to sustainab

CONTINUE

✎ Guarantee Secure Chain-of-Custody

Ensure your workflow stays secure, compliant, and tracked when devices need returned or reach end-of-life.

> Modern UI optimized with the User in mind to ensure ease of use.

> User friendly instructions — no technical knowledge needed with custom presets and automation.

> Ability to deliver erasure reports with full audit trail real-time to Securaze Dashboard.

> Offline erasure - if limited or no internet connection, supported by Securaze Motion App.

Maximize Data Security

Maintain conrol over data sanitization requirements from a single location.

> Erase data at the source to eliminate the risk of data-in-transit.

> Tamper-proof reporting complete with 256 bit encryption, 2048 bit RSA key digital signature.

> GDPR compliant, Common Criteria EAL2+, TÜV and ADISA certified.

> Pre-install option for asset deployment.

Optimize Asset Management

Complete asset information and reporting with integration into 3rd party systems, including ServiceNow, Intune and more.

> Capture asset info and start erasures in a matter of seconds.

> Critical information is automatically collected.

> Designed for low-impact integration into your current asset management workflows.
